ERRATA

1. On page 354, paragraph 3, lines 17–18 it is stated: “... but three dropped out of the study” referring to three patients. The reference should have been made to renal stones, rather than patients. The statement should read “... but in three cases renal stones were no longer detectable in spite of the continuous treatment of patients with the drug.”

2. On page 355, paragraph 2, lines 2 and 5–6 it is stated: “Zonisamide is usually divided into three equal dosages.” It should read: “Zonisamide is taken once to three times daily.” Also, on line 5: “In children zonisamide is taken once to three times daily.”

One of the major advantages of zonisamide is that the drug can be used once daily.
